

## BOLUWATIFE URBAN KPOMASSI

### Frontend / MERN Stack Developer

Lagos, Nigeria | +234 807 096 6457 | [kpomassiboluwatifeu@gmail.com](mailto:kpomassiboluwatifeu@gmail.com).

**LinkedIn:** <https://linkedin.com/in/boluwatife-kpomassi-472b202b7> | **GitHub:** [github.com/isaacurba](https://github.com/isaacurba)

---

## CAREER OBJECTIVE

Passionate **Frontend/MERN Stack Developer** and **Technical Instructor** with a strong foundation in **React.js** and modern UI libraries. Proven ability to debug complex code and explain technical concepts clearly. Currently applying full-stack skills to build scalable applications while mentoring the next generation of developers at Digital Fortress.

---

## TECHNICAL SKILLS

**Frontend:** React.js, Tailwind CSS, Shadcn UI, Radix UI, Context API, JavaScript (ES6+),

**Backend:** Node.js, Express.js, RESTful APIs, CRUD Operations. **Database & Auth:** MongoDB, Mongoose, JWT (JSON Web Tokens), Appwrite Auth, Bcrypt. **Tools:** Git, GitHub, VS Code, Postman, Agile Methodology.

---

## PROFESSIONAL EXPERIENCE

### IT Instructor Digital Fortress | Surulere, Lagos June 2025 – Present

- Mentoring students in web development fundamentals, fostering a deep understanding of **HTML, CSS, and JavaScript**.
- Reviewing and **debugging student code** to identify logic errors, which has sharpened my own ability to spot bugs quickly.
- Breaking down complex technical concepts into easy-to-understand lessons, demonstrating strong communication and leadership skills.
- Managing classroom activities and ensuring students meet curriculum milestones.

### Frontend Developer Intern NIIT | Surulere, Lagos February 2024 – May 2024

- Collaborated with the development team to build responsive UI components using **React.js** and **Tailwind CSS**.
  - Translated UI/UX design wireframes into functional, cross-browser compatible web pages.
  - Participated in code reviews and utilized **Agile workflows** to manage project tasks efficiently.
- 

## KEY PROJECTS

### LGA-Connect (Citizen & Staff Portal) – Work in Progress Stack: React, Node.js, Tailwind, Shadcn

**Repo:** <https://github.com/isaacurba/lga-community>

- **Currently developing** a dual-portal system to connect local government staff with citizens.
- **Designing** secure login interfaces with distinct access levels (Admin vs. User).
- **Implementing** a professional, accessible interface using the **Shadcn UI** library.

**Finance Dashboard – Authentication & User Management Stack:** *React, Tailwind, Appwrite Auth, Shadcn*

**Repo:** <https://github.com/isaacurba/finance-dashboard>

- Built secure authentication (signup/login) using **Appwrite Auth**.
- Designed a modern dashboard UI using **Shadcn components** for a professional look.
- Implemented protected routes to ensure only authenticated users can access financial data.

**NoteApp – CRUD Note-Taking App Stack:** *MERN (MongoDB, Express, React, Node)*

**Repo:** <https://github.com/isaacurba/NoteApp>

- Developed complete **CRUD operations** (Create, Read, Update, Delete) for user notes.
- Architected a REST API using **Express & MongoDB** to handle data efficiently.
- Implemented **JWT authentication** for secure session management and user privacy.
