ISAAC URBAN

Software Engineer | Backend & Full-Stack Developer

Lagos, Nigeria | +234 807 096 6457 | isaacurban.dev@gmail.com
linkedin.com/in/isaac-urban-472b202b7 | github.com/isaacurba

PROFESSIONAL SUMMARY

Software Engineer with practical experience building maintainable backend services and full-stack applications using Java, Python, JavaScript, Spring Boot, FastAPI, Node.js, Express.js, and React. Experienced in developing RESTful APIs, designing relational and NoSQL databases, implementing authentication, and applying object-oriented programming and layered architecture. Writes automated tests with JUnit and pytest, with strong skills in database integration, debugging, and software design.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, SQL
Backend Development: Spring Boot, FastAPI, Node.js, Express.js, RESTful APIs, CRUD Operations, Layered Architecture
Databases & ORMs: PostgreSQL, MySQL, MongoDB, Spring Data JPA, SQLAlchemy, Mongoose
Frontend Development: React.js, Tailwind CSS, Shadcn UI, Radix UI, Context API
Authentication & Security: JWT, Appwrite Auth, Bcrypt
Testing & Practices: JUnit, pytest, Automated Testing, Object-Oriented Programming, SOLID Principles, Design Patterns, Agile/Scrum
Tools & Platforms: Git, GitHub, Postman, VS Code, PyCharm

PROJECTS

Job Application Tracker

Java, Spring Boot, PostgreSQL, Spring Data JPA, JUnit

- Built a backend application in Java and Spring Boot for managing job applications, with persistent storage in PostgreSQL through Spring Data JPA.
- Designed domain models for users and job applications, applying entity relationships and data validation.
- Structured the backend using a layered architecture to separate concerns and keep the code maintainable.
- Implemented job application status management.
- Wrote automated tests with JUnit.

Pharmacy Management System

Java, Spring Boot, Layered Architecture

- Developed a Java and Spring Boot backend application for managing pharmacy drug inventory.
- Applied a layered architecture to separate application responsibilities.
- Implemented CRUD operations so chemists can add, retrieve, update, and delete drug records.
- Structured application logic around pharmacy inventory management.

Restaurant Ordering System

Python, FastAPI, SQLAlchemy, MySQL, pytest, REST APIs

- Engineered a modular backend using a layered architecture of controllers, services, repositories, and DTOs.
- Designed relational database schemas for customers, administrators, menu categories, orders, and order items.
- Implemented RESTful endpoints for catalog management and order lifecycle operations.
- Added request validation and structured error handling.
- Wrote automated unit and integration tests with pytest.

LGA-Connect: Citizen & Staff Portal

React, Node.js, Express.js, Tailwind CSS, Shadcn UI

- Built a full-stack portal supporting administrative workflows and citizen request submissions.
- Implemented token-based authentication and role-based access control.
- Developed reusable, accessible UI components with Tailwind CSS and Shadcn UI.
- Connected frontend components to backend endpoints.

PROFESSIONAL EXPERIENCE

Freelance Software Engineer October 2024 – Present
Self-Employed *Lagos, Nigeria*

- Develop web applications and software solutions to client requirements using JavaScript, Python, Node.js, and React.
- Design and integrate relational and document databases.
- Implement authentication mechanisms and RESTful APIs.
- Test, debug, and optimize application logic throughout development.
- Use Git and GitHub for version control and project management.

IT Instructor June 2025 – January 2026
Digital Fortress *Surulere, Lagos*

- Taught programming fundamentals, algorithmic logic, and web development through structured lessons and practical exercises.
- Reviewed and debugged student applications, identifying syntax, logic, and structural errors.
- Guided students through software development projects, reinforcing problem-solving, debugging, and modern development workflows.

Frontend Developer Intern February 2024 – May 2024
NIIT *Surulere, Lagos*

- Developed responsive, reusable React components using Tailwind CSS.
- Implemented user interfaces from technical wireframes.
- Participated in Agile development activities, sprint discussions, and team code reviews.

EDUCATION & TRAINING

Software Engineering & Techpreneurship Program, Semicolon Africa
Web Development Training Program, WAVE / NIIT

LANGUAGES

English (Fluent)
